1. Which characteristic of cloud computing enables cost savings by serving multiple consumers?

1 / 1 point

- ☐ Broad network access
- ☒ Resource pooling
- ☐ On-demand self-service
- ☐ Public cloud models

✔ **Correct**  
Correct! With resource pooling, consumers save on costs when using a shared model.

2. Which 1950s network feature helped evolve Virtual Machines (VMs)?

1 / 1 point

- ☒ Shared access to a mainframe
- ☐ Broad network access
- ☐ Measured service
- ☐ Security, compliance, and performance

✔ **Correct**  
Correct! Time-sharing or resource pooling allowed multiple users to access the same data storage layer and CPU power on mainframes using dumb terminals.

3. What are some cloud computing benefits?

1 / 1 point

- ☐ Offline capability and security
- ☐ Purchasing off-the-shelf software and upgrades
- ☐ Diversity of standardization
- ☒ Competitive advantage, flexibility, and efficiency

✔ **Correct**  
Correct! Cloud services make some of the most innovative technologies available to enterprises. Cloud-based applications and data are available from any location with an internet connection. Cloud infrastructure scales on demand to support fluctuating workloads.

4. Which of these vendors is known more for their SaaS offerings?

1 / 1 point

- ☐ Intel
- ☐ Alibaba Cloud
- ☐ Amazon Web Services
- ☒ Salesforce

✔ **Correct**  
Correct! This cloud provider has SaaS offerings with applications including ERP, SCM, CRM, HRMS, Finance, Marketing, and Sales.
