1. Which of the following is a code storage tool? 1 / 1 point

- ☐ HTML
- ☒ Git
- ☐ IDE
- ☐ Code Editor

☒ Correct
Correct! You can use Git to store your code.

2. Which of the following technologies adds more styles and function to CSS? 1 / 1 point

- ☐ HTML
- ☐ SASS
- ☒ LESS
- ☐ MORE

☒ Correct
Correct! Leaner CSS (LESS) uses JavaScript to add styles and functions to CSS.

3. Which of the following statements is true regarding pair programming? 1 / 1 point

- ☒ Pair programming is a type of agile development where two developers plan and discuss their ideas as they create a solution.
- ☐ Most developers find pair programming to be an unproductive use of their time.
- ☐ Pair programming requires two developers to be in the same physical location.
- ☐ Pair programming always consists of one developer typing in the code while the other is reviewing the code as it's written.

☒ Correct
Correct! Pair programming is a type of agile development where the two developers can plan and discuss their ideas continually as they create a solution, generally resulting in a better end product.

4. Which of the following do version control systems help you keep track of? 1 / 1 point

- ☐ Bug reports.
- ☐ Program flow.
- ☐ Errors in the code.
- ☒ Who changed the code.

☒ Correct
Correct! Version control systems help you track what changes were made to the code, who made the changes, and when they were made.

5. Which type of software engineer develops the software that users interact with? 1 / 1 point

- ☐ Systems developer
- ☒ Front-end engineer
- ☐ Back-end engineers
- ☐ Network engineer

☒ Correct
Correct! Front-end engineers develop user interfaces.

6. Which of the following is an example of a hard skill? 1 / 1 point

- ☐ Communication
- ☐ Problem solving
- ☒ Cloud computing
- ☐ Adaptability

☒ Correct
Correct! Cloud computing is a hard skill which can be learned and measured.

7. Which of the following are reasons for the high demand for software engineers? 1 / 1 point

- ☒ Most organizations need software applications and websites.
- ☐ Many software engineers are retiring.
- ☐ Lots of software engineers are leaving the industry.
- ☐ There's a lack of people interested in the field.

☒ Correct
Correct! Because most organizations need software applications and websites for their company to function, more software engineers are needed.

8. A senior software engineer often: 1 / 1 point

- ☐ Identifies hiring needs for a company.
- ☐ Takes responsibility for the overall architecture and design of a product.
- ☐ Monitors the requirements for corporate technologies.
- ☒ Mentors other software engineers.

☒ Correct
Correct! Senior software engineers often mentor their junior colleagues.

9. Which of the following is an advantage of using the software development lifecycle (SDLC)? 1 / 1 point

- ☐ Increases risks
- ☒ Respond to changing requirements
- ☐ Team members share the same roles and responsibilities
- ☐ Solve problems during the coding phase

☒ Correct
Correct! SDLC is an iterative process so at the end of a cycle the process can circle back to incorporate additional requirements

10. Which software development process verifies that the software matches established requirements and is free from bugs? 1 / 1 point

- ☐ Debugging
- ☒ Testing
- ☐ Design
- ☐ Coding

☒ Correct
Correct! Testing ensures that the software has no errors, gaps, or missing requirements.

11. Which of the following specifications specifies policy and regulation requirements? 1 / 1 point

- ☐ User Requirements Specification (URS)
- ☐ Software Requirements Specification (SRS)
- ☒ System Requirements Specification (SysRS)
- ☐ Application Requirements Specification (ARS)

☒ Correct
Correct! The SysRS specifies policy and regulation requirements.

12. Which of the following software development methodologies easily handles changing requirements and enables feedback to be regularly incorporated into the solution? 1 / 1 point

- ☒ Agile
- ☐ Sequential
- ☐ V-shape model
- ☐ Waterfall

☒ Correct
Correct! Agile development is an iterative model that uses quick, short bursts of development.

13. Fill in the blank. An attribute of an object is called a _____. 1 / 1 point

- ☒ property
- ☐ blueprint
- ☐ instance
- ☐ class

☒ Correct
Correct! Objects contain data or attributes which are called properties.

14. Which of the following is a characteristic of a component? 1 / 1 point

- ☒ Extensible
- ☐ Repeatable
- ☐ Context-specific
- ☐ Revisable

☒ Correct
Correct! Components should be extensible so new capabilities can easily be added to them.

15. Which type of architecture is a computing model in which a server hosts, delivers, and manages most of the resources and services delivered to a client? 1 / 1 point

- ☐ Microservices
- ☐ 3-tier
- ☐ Peer-to-peer
- ☒ 2-tier

☒ Correct
Correct! 2-tier architecture is also known as client-server architecture.

16. Which environment is intended for use by all users? 1 / 1 point

- ☐ Staging
- ☒ Production
- ☐ QA
- ☐ Development

☒ Correct
Correct! The production environment is intended for all users.

17. Which one of the following is an example of an interpreted programming language? 1 / 1 point

- ☐ C
- ☐ C++
- ☒ JavaScript
- ☐ Java

☒ Correct
Correct! JavaScript is an example of an interpreted programming language.

18. What four key database operations does the acronym CRUD stand for? 1 / 1 point

- ☐ Create, Read, Undo, Detain
- ☒ Create, Read, Update, Delete
- ☐ Correct, Randomize, Undo, Delete
- ☐ Correct, Read, Update, Detain

☒ Correct
Correct! These are the query language terms referred to by CRUD.

19. The "While" keyword is used to perform which of the following type of programming logic? 1 / 1 point

- ☐ If
- ☐ Branch
- ☒ Loop
- ☐ For

☒ Correct
Correct! The While keyword is used to create a loop.

20. What is the name of a special type of identifier that you can use to reference multiple program elements? 1 / 1 point

- ☐ Identifier
- ☐ Constant
- ☐ Variable
- ☒ Container

☒ Correct
Correct! You can use a container to reference multiple elements.
