1. Which storage type is sometimes called "Local Storage"?　　　　　　　　　　　　　1 / 1 point

○ File Storage

○ Object Storage

◉ Direct Attached

○ Block Storage

> ⊘ **Correct**
> Correct! Direct Attached storage is sometimes referred to as 'Local Storage' because it's presented directly to a cloud-based server and is effectively either within the host server chassis or within the same rack.

2. What is another name for File Storage?　　　　　　　　　　　　　　　　　　　1 / 1 point

○ Ethernet

○ Direct attached storage

◉ NFS

○ COS

> ⊘ **Correct**
> Correct! File Storage is mounted to compute nodes via an ethernet network and is sometimes referred to as 'Network File Storage' or NFS.

3. Which of the following is true for block storage?　　　　　　　　　　　　　　　1 / 1 point

◉ Can only be attached to one node at a time

○ Is attached to compute nodes using an ethernet network

○ Can be attached to multiple compute nodes at once

○ Is used where workloads do not require lightning fast connectivity to storage

> ⊘ **Correct**
> Correct! Block storage can only be attached to one node at a time.

4. Which of the following is true for Object storage?　　　　　　　　　　　　　　1 / 1 point

○ Cannot be used to store files

◉ You cannot run operating systems or databases

○ Used where fast read and write speeds are necessary

○ Can store applications where content of the file changes

> ⊘ **Correct**
> Correct! You cannot run operating systems or other applications such as databases using Object Storage.

5. What is a Content Delivery Network (CDN)?　　　　　　　　　　　　　　　　　1 / 1 point

○ A network node

◉ A distributed server network

○ A network link

○ Network topology

> ⊘ **Correct**
> Correct! A CDN is a distributed server network that delivers temporarily stored or cached copies of website content to users based on the user's geographic location.
